

EU4Health Procurement: Additional information from Q&A

The following answer was kindly provided by HaDEA in writing in reference to a question that could not be covered fully during the runtime of the EU4Health National InfoDay Austria 2023.

Question: What kind of advance warning/predictability may successful tenderers of a framework contract (FWC) expect for the individual invitations to offer services that they will receive under the FWC (i.e. is a draft timeline of when/how often notices may be issued across the FWC period ever provided at the start of, or at different periods during, a FWC)?

Answer: *“The FWC is designed with a maximum ceiling, therefore successful contractors could divide the total amount by the years of enforcement of the FWC, which gives a rough estimation of the financial resources per year to be possibly contracted. Having a precise timeframe of the number and the volume of the contracts foreseen under the FWC is not possible, as the requests are needs-based”.*
